

How to use Google Classroom

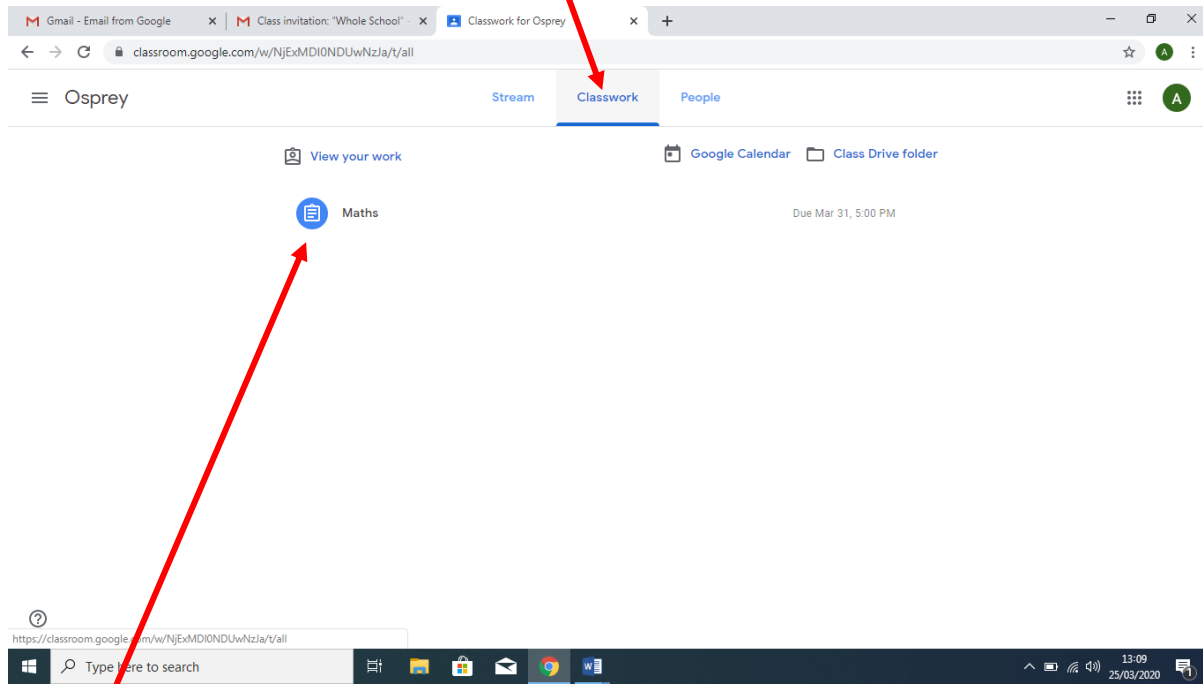

Once you are logged into Google Classroom, you can select where you would like to go, there will be lots going on in the Whole School Classroom but all your work and lessons will take place in your named Classroom.

You will be able to see messages from your class mates and upcoming work in the Stream. You can post messages to the whole class in the Stream, remember to be kind, polite and respectful as everyone can see what you have written (including me – Mrs Long).

Your teachers have been working really hard to plan lessons for you. These will appear in the Classwork area. You need to look here each day to see your work.

Click on the work to see the instructions and activities. Your teachers will tell you which book they would like you to complete your work in.
